

Main sol. 2

Main sol. 1

Urea

1000.00 ml

20.00 g/l

1. To medium 1 add 20 g/l urea before autoclaving. Do not adjust pH; pH raises to about 8 due to heat degraded urea.
2. For sporulation enhancement add 10 mg/l $\text{MnSO}_4 \times \text{H}_2\text{O}$.
