

Main sol. 420

Blood agar No 2	1000.00	ml
Horse blood	40.00	ml/l

1. Sterilize blood agar No 2 (Oxoid). After autoclaving cool to 50°C, then add 40 ml/l of sterile horse blood.

2. Rehydrate pellets of freeze-dried ampoules in liquid medium 220 or 1. For rehydration of *Helicobacter* and *Campylobacter* spp., use medium 215 (brain heart infusion).
